CONTENTS OF VOLUME 10

Number 1

H. VAN DOP and S. KRUIZINGA: The decrease of sulphur dioxide concentrations near Rotterdam and their relation to some meteorological parameters during thirteen consecutive winters (1961–1974) 1
S. B. IDSO: Complexities of surface albedo determinations during duststorms 5
M. T. KLEINMAN, T. J. KNEIP and M. EISENBUD: Seasonal patterns of airborne particulate concentrations in New York City 9
M. J. PILAT and A. PREM: Calculated particle collection efficiencies of single droplets including inertial impaction, Brownian diffusion, diffusiophoresis and thermophoresis 13
M. DEMUYNCK, K. A. RAHN, M. JANSSENS and R. DAMS: Chemical analysis of airborne particulate matter during a period of unusually high pollution 21
C. C. VAN VALIN, R. F. PUESCHEL, F. P. PARUNGO and R. A. PROULX: Cloud and ice nuclei from human activities 27
A. W. STRUEMPLER: Trace metals in rain and snow during 1973 at Chadron, Nebraska 33
S. KADOWAKI: Size distribution of atmospheric total aerosols, sulfate, ammonium and nitrate particulates in the Nagoya area 39
M. TERRY DANA and JEREMY M. HALES: Statistical aspects of the washout of polydisperse aerosols 45
L. STOCKBURGER, III and J. HEICKLEN: The inhibition of photochemical smog—IV. Effect of diethylhydroxylamine on particle production 51
S. J. MAINWARING and S. HARSHA: Size distribution of aerosols in Melbourne city air 57
G. M. AYLING and H. BLOOM: Heavy metals analyses to characterize and estimate distribution of heavy metals in dust fallout 61
R. HEINDRYCKX: Comparison of the mass-size functions of the elements in the aerosols of the Gent industrial district with data from other areas. Some physico-chemical implications 65
M. R. PACK and C. W. SULZBACH: Response of plant fruiting to hydrogen fluoride fumigation 73

Discussions

J. W. ROBINSON, H. DELLA FIORENTINA, F. DE WIEST and J. DE GRAEVE: Détermination par spectrométrie infrarouge de la matière organique non volatile associée aux particules en suspension dans l'air—I. Choix des conditions opératoires 83
D. G. HORNE, R. L. BOHAC, W. R. DERRICK and D. J. MOORE: Sensitivity of the Gaussian plume model 84
M. PAYRISSAT: Laboratory measurements of the uptake of sulphur dioxide by different European soils 84
W. H. WHITE, R. B. HUSAR, K. J. CHU and J. H. SEINFELD: Formulation and initial application of a dynamic model for urban aerosols 85

Errata 86
Preparation of Papers for *Atmospheric Environment* 87

Number 2

Y. BELOT, A. BAILLE et J.-L. DELMAS: Modèle numérique de dispersion des polluants atmosphériques en presence de couverts végétaux. Application aux couverts forestiers 89
R. R. DRAXLER: Determination of atmospheric diffusion parameters 99
D. P. CHOCK and S. B. LEVITT: A space–time correlation study of oxidant and carbon monoxide in the Los Angeles basin 107
H. NIEBOER and J. VAN HAM: Peroxyacetyl nitrate (PAN) in relation to ozone and some meteorological parameters at Delft in the Netherlands 115
JOHNNY FREIBERG: The iron catalyzed oxidation of SO_2 to acid sulphate mist in dispersing plumes 121
J. PICH: Theory of diffusive deposition of particles in a sphere and in a cylinder at small Fourier numbers 131
H. MAYRSOHN and J. H. CRABTREE: Source reconciliation of atmospheric hydrocarbons 137
A. H. MIGUEL, D. F. S. NATUSCH, R. L. TANNER and J. L. HUDSON: Adsorption and catalytic conversion of thiol vapors by activated carbon and managanese dioxide 145
J. A. FRASER and J. C. DAY: Receptor reaction to odor-stress. A paradigm and methodological exploration 151

Short Communications

H. BUCH, H. BJERREGAARD PEDERSEN and IRENA SZTOKHAMER: The variations in the concentrations of airborne particulate matter with wind direction and wind speed in Denmark 159
M. M. BENARIE: Empirical dosage–distance relationships around a point source—at ground level 163

Letter to the Editors

D. CAMUFFO: How to obtain mean value and variance of wind direction by using a sine–cosine transducer 167

Discussions

E. L. KOTHNY, C. HUYGEN and R. W. LANTING: On the Saltzman factor 169
F. GIFFORD, S. A. LEBEDEFF and S. HAMEED: Study of atmospheric transport over area sources by an integral method 170

J. O. LEDBETTER and B. A. SOLDANO: Air-borne organo-mercury and elemental mercury emissions with emphasis on central sewage facilities 171
B. WEISMAN, L. K. PETERS and G. R. CARMICHAEL: On the criteria for the occurrence of fumigation inland from a large lake 172

Book Reviews 175

Announcement
Conference on Control of Gaseous Sulphur and Nitrogen Compound Emission to be held at University of Salford, April 1976 176

Preliminary Communication
R. S. SCORER: A commentary on ozone depletion theories 177

Number 3

R. J. BREEDING, H. B. KLONIS, J. P. LODGE, JR., J. B. PATE, D. C. SHEESLEY, T. R. ENGLERT and D. R. SEARS: Measurements of atmospheric pollutants in the St. Louis area 181
G. D. NASTROM and K. T. WHITBY: Influence of air parcel trajectories on aerosol variability in the Los Angeles basin, a case study for 20 September 1972 195
R. B. HUSAR and W. H. WHITE: On the color of the Los Angeles smog 199
T. ARIMAN and L. TANG: Collection of aerosol particles by fabric filters in an electrostatic field 205
J. R. RICHARDS, D. L. FOX and P. C. REIST: The influence of molecular complexes on the photo-oxidation of sulfur dioxide 211
R. J. KIND: A critical examination of the requirements for model simulation of wind-induced erosion/deposition phenomena such as snow drifting 219
T. G. DZUBAY, L. E. HINES and R. K. STEVENS: Particle bounce errors in cascade impactors 229
CHI-HUNG SHEN and GEORGE S. SPRINGER: Photochemical particulate formation in sulfur dioxide–air mixtures 235
M. B. BAKER: Energy absorption by volatile atmospheric aerosol particles 241

Discussions
N. R. RAJAPPA, G. M. BRAGG, L. VAN ZUIDEN and C. E. HERMANCE: The free fall of cylinders at intermediate Reynolds' number 249
HANS PANOFSKY and J. COUNIHAN: Adiabatic atmospheric boundary layers: a review and analysis of data from the period 1880–1972 249
W. STÖBER, N. FRANZES and W. STEINHANSES: Improvement of the bearing system of the Stöber aerosol spectrometer 251

News and Book Reviews 253

Recent Papers—Some Titles of Interest 256

Preliminary Communication
GARY C. THOM and WAYNE R. OTT: A proposed uniform air pollution index 261

Number 4

Progress Report
Routine sulphur dioxide surveys around large modern power stations
A. J. CLARKE and G. SPURR: I—Summary paper 265
R. T. JARMAN and C. M. DE TURVILLE: II—Fawley and Pembroke 269
A. W. POWELL and P. A. TATCHEL: III—Kingsnorth 276
F. R. BARBER and A. MARTIN: IV—Ratcliffe-on-Soar 281
D. L. DOLMAN and P. M. OWENS: V—Eggborough 285
F. W. DALE: VI—Fiddler's Ferry 290

Research Papers
T. NASH: Sensitivity limits of the conductivity method for measuring the concentration of atmospheric sulphur dioxide 297
C. J. DERRETT and C. BROWN: A fast response sulphur dioxide meter for laboratory studies 303
R. A. COX, R. G. DERWENT, A. E. J. EGGLETON and J. E. LOVELOCK: Photochemical oxidation of halocarbons in the troposphere 305
CHUL PARK: Estimates of nitric oxide production for lifting spacecraft re-entry 309
D. F. S. NATUSCH and J. R. WALLACE: Determination of airborne particle size distributions: calculation of cross-sensitivity and discreteness effects in cascade impaction 315
A. GARNETT, P. READ and D. FINCH: The use of conversion factors in air pollution studies: sulphur dioxide ppm—$\mu g\ m^{-3}$ 325
K. E. TORRANCE and J. S. W. SHUM: Time-varying energy consumption as a factor in urban climate 329

Preliminary Communication
P. A. BOARD: Anaerobic regulation of atmospheric oxygen 339

Vol. 10
1976

Number 5

Review Paper
C. SANDORFY: U.V. absorption of fluorocarbons 343

Research Papers
J. A. GARLAND and J. R. BRANSON: The mixing height and mass balance of SO_2 in the atmosphere above Great Britain 353
B. L. DAVIS, D. N. BLAIR, L. R. JOHNSON and S. J. HAGGARD: A study of the green area effect in the Black Hills of South Dakota 363
K. W. RAGLAND: Worst-case ambient air concentrations from point sources using the Gaussian Plume Model 371
S. TRIVIKRAMA RAO, P. J. SAMSON and A. R. PEDDADA: Spectral analysis approach to the dynamics of air pollutants 375
H. E. MOORE and S. E. POET: Background levels of ^{226}Ra in the lower troposphere 381
T. E. GRAEDEL and D. L. ALLARA: Tropospheric halocarbons: estimates of atmospheric chemical production 385
G. TARDOS, N. ABUAF and C. GUTFINGER: Diffusional filtration of dust in a fluidized bed 389
E. O. KNUTSON, S. K. SOOD and J. D. STOCKHAM: Aerosol collection by snow and ice crystals 395
P. R. ROBERTS and S. K. FRIEDLANDER: Analysis of sulfur in deposited aerosol particles by vaporization and flame photometric detection 403
YASUA UENO: Studies of salt-solution aerosols—XIII. Effect of surface-active substances on the stability of aqueous salt solution aerosols 409

Technical Note
DARIO CAMUFFO and ANGELO DENEGRI: A method for measurement of mean wind direction with the use of standard potentiometric transducers 415

Book Reviews 416

Discussions
RICHARD D. CADLE: The photo-oxidation of hydrogen sulphide and dimethyl sulphide in air 417
S. B. IDSO: Further Discussion on: Influence of surface albedo on the change in the atmospheric radiation balance due to aerosols 417
R. K. DUMBAULD and J. F. BOWLERS, JR.: Point source atmospheric diffusion model 417
GÖRAN NORDLUND, MEI-KAO LIU and JOHN H. SEINFELD: On the validity of grid and trajectory models of urban air pollution 418
E. W. BARRETT: On the criteria for the occurrence of fumigation inland from a large lake 419

Number 6

P. D. PARR, F. G. TAYLOR, JR. and J. J. BEAUCHAMP: Sensitivity of tobacco to chromium from mechanical draft cooling tower drift 421
PATRICK T. BRENNAN, DAVID E. SEYMOUR, MICHAEL J. BUTLER, MARK L. KRAMER, MAYNARD E. SMITH and THEODORE T. FRANKENBERG: The observed rise of visible plumes from hyperbolic natural draft cooling towers 425
R. C. JOYNT and D. R. BLACKMAN: A numerical model of pollutant transport 433
C. R. DORN, J. O. PIERCE, II, P. E. PHILLIPS and G. R. CHASE: Airborne Pb, Cd, Zn and Cu concentration by particle size near a Pb smelter 443
W. CAUTREELS and K. VAN CAUWENBERGHE: Determination of organic compounds in airborne particulate matter by gas chromatography–mass spectrometry 447
J. T. PETERSON and K. L. DEMERJIAN: The sensitivity of computed ozone concentrations to u.v. radiation in the Los Angeles area 459
U. BONAFÈ, G. CESARI, G. GIOVANELLI, T. TIRABASSI and O. VITTORI: Mask correlation spectrophotometry advanced methodology for atmospheric measurements 469
MIKIO KASAHARA and KANJI TAKAHASHI: Experimental studies on aerosol particle formation by sulfur dioxide 475

Short Communication
F. DE WIEST et D. RONDIA: Sur la validité des déterminations du benzo (a) pyréne atmosphérique pendant les mois d'été 487

Conference Report
D. E. SHILLITO: International Clean Air and Pollution Control Conference, Brighton 20–24 October 1975 491

Discussions
N. THOMPSON: Point source atmospheric diffusion model with variable wind and diffusivity profiles 493
HERBERT C. MCKEE: Correlations between methods for measuring suspended particulates in ambient air 493
HANK DEQUASIE: Best Practicable Means and presumptive limits: British definitions 493
S. A. CHANGNON, JR: A comparison of urban climatic modifications in three cities 494
F. B. SMITH: Diffusion from a line source in urban atmosphere 494
C. JUNGE: Survey and analysis of halocarbons in the atmosphere by gas chromatography–mass spectrometry 495
H. D. AXELROD and J. P. GREENBERG: Determination of trace concentration of ammonia in the atmosphere using pyridine–pyrazolone reagent 495

Erratum 497

Announcement
Residential Courses at Loughborough University 498

Number 7

M. M. MILLAN, A. J. GALLANT and H. E. TURNER: The application of correlation spectroscopy to the study of dispersion from tall stacks 499
C. Y. LIU and W. R. GOODIN: A two-dimensional model for the transport of pollutants in an urban basin 513
B. CROS: Daily variation in the concentration of Aitken nuclei in Brazzaville (Congo) 527
D. J. WILLIAMS and B. C. MOSER: Airborne sea salt sedimentation measurements and a method of reproducing ambient sedimentation rates for the study of its effect on vegetation 531
G. P. MENEES and C. PARK: Nitric oxide formation by meteoroids in the upper atmosphere 535
J. V. DAVE and P. HALPERN: Effect of changes in ozone amount on the ultra-violet radiation received at sea level of a model atmosphere 547
T. OHTA, M. MORITA and I. MIZOGUCHI: Local distribution of chlorinated hydrocarbons in the ambient air in Tokyo 557

Short Communication
B. T. COMMINS and L. HAMPTON: Changing pattern in concentrations of polycyclic aromatic hydrocarbons in the air of Central London 561

Discussions
G. G. DESAEDELEER, J. W. WINCHESTER, M. DEMUYNCK and R. DAMS: One-year study of total suspended particulate matter at 14 locations in Belgium 563
F. A. GIFFORD, S. R. HANNA and H. H. J. M. GOUMANS: A simple model to calculate the SO_2-concentrations in urban regions 564
K. W. RAGLAND and F. LEBRON: A comparison of weekend–weekday ozone and hydrocarbon concentrations in the Baltimore–Washington metropolitan area 564
J. W. ROBINSON and A. W. STRUEMPLER: Trace metals in rain and snow during 1973 at Chadron, Nebraska, U.S.A. 565
E. R. STEPHENS, H. NIEBOER and J. VAN HAM: Peroxyacetyl nitrate (PAN) in relation to ozone and some meteorological parameters at Delft in the Netherlands 566
P. W. SUMMERS and D. M. LEAHEY: An application of a simple advective pollution model to the city of Edmonton 567

Announcement
1976 Divers Gas Purity Symposium 570

Number 8

R. E. VAN GRIEKEN, T. B. JOHANSSON, K. R. AKSELSSON, J. W. WINCHESTER, J. W. NELSON and K. R. CHAPMAN: Geophysical applicability of aerosol size distribution measurements using cascade impactors and proton induced X-ray emission 571
E. B. SANSONE and THOMAS BERNARD: Particle collection by probes of nil and infinite bluntness 577
J. ALSTE, D. WATSON and J. BAGG: Airborne asbestos in the vicinity of a freeway 583
J. D. HUSAR, R. B. HUSAR, E. S. MACIAS, W. E. WILSON, J. L. DURHAM, W. K. SHEPHERD and J. A. ANDERSON: Particulate sulfur analysis: application to high time resolution aircraft sampling in plumes 591
